

Intro to Robotics at West Winds

KINGBOROUGH
ROBOTICS

(FREE Workshops for Kids)

create - code - play

Intro to Ozobots for ages 8 - 12 years Tuesday 25th February

3:45pm - 4:45pm

We are back again!

Come and meet our awesome little robots, Ozobots. Find out how to code screen free using the Color Code markers or use the EVO app. Suitable for beginners or those who have already been to a previous session.

Enrolments are required for all children attending. This is to ensure we have enough equipment on the day. Please do not enrol adult places.

There is one presenter for this class. If your child requires individual support please come along on the day. We promise it will be fun and you will learn something too!

If you are bringing smaller children it may be a good idea to bring some toys/drawing etc to keep them engaged whilst the session is on. *Thank you.*

Enrol through Eventbrite link (Or Email westwinds@woodbridge.com.au for the link)
